### FROM COURIER FILES

#### TEN YEARS AGO

One hundred years ago last week occurred the great New Madrid earth quake which the Great Lake was formed.

W. A. Jones has a large number of men at work building his new brick building on the old site.

The Hickman Wright Co. played here Monday night a good house in their new company. "The Lady and the Lark."

Prof. M. W. Henson the well known musician and composer received from the press Monday his new song, "Hickman."

The new railroad will be finished into Hickman before the end of the present week. Why not declare a half holiday in honor of the event?

#### FIVE YEARS AGO

John Lee Matthews a former resident of the upper bottom died Sunday (May 12).

Prof. B. F. Gentry has accepted the presidency of the Hickman Institute.

Prof. J. M. Gentry of Princeton has been elected principal of the Hickman Institute for the year 1920-21.

The Young Ladies of the First Baptist church will give a spelling match at the home of J. F. Brown Friday evening.

James C. Hall will leave next week to be building a school a short time ago in Mexico & Minnesota.

The condition of the wheat crop the country here is one of the gloomiest outside and in a long time.

The people of the United States are taking the summer of war on every hand from every point of the compass.

### MAY START NEW PACKET.

According to reports now making the rounds, a new packet boat is possible on this part of the Mississippi, the St. Louis & Tennessee River Packet Company having under consideration on the St. Louis and Memphis trade and if the business is profitable they expect to continue the service through the winter.

The company owns some fine boats and has ample capital to develop the St. Louis-Memphis trade. There is no boat making this trade at the present and there has been no regular packet between these two cities since the discontinuance of the Lake Line steamers. In this territory several years ago it seems to us that good business, both passenger and freight, should be the result of the establishment of this packet service.

### TAKES OVER LEVEE CONTRACT.

M. J. Roach, of the firm of Roach & Stussell, levee contractors of Memphis, has taken over the old Ramsey contract in New Madrid County, Mo. and the work is going forward under his supervision. A new contract was let last week at Memphis for 200,000 yards. This is the extension of the Muddy levee in the foothills above New Madrid on which George Ramsey was killed last fall in the dynamite explosion.

### CARD OF THANKS.

We take this means of expressing our deeply felt gratitude for the kindness and many expressions of sympathy extended to us by our friends during our bereavement through the death of our husband and father, Seth Carlin.

Mrs. Bessie Carlin  
Dr. C. W. Carlin

Forty-four boys and girls, comprising the graduating class of the Mayfield High School, one of the largest ever graduated from that school, Dr. J. W. Gilliam, pastor of the First Baptist Church, of that place will preach the bi-centennial sermon next Sunday.

### THE U. S. ROYAL CORD

A famous tire—and a famous tread. Acknowledged among motorists and dealers alike as the world's foremost example of Cord tire building. Always delivering the same repeated economy, tire after tire, and season after season.

The stripe around the sidewall is registered as a trade-mark in the U. S. Patent Office.

## How you can measure tire value in 1921

"Any U. S. Tire is a universal full-money's worth."

OFTEN it's surprising the number of different tire views that come out in a chance talk at the curb or in the leisure of a friend's garage.

Almost every day you come across the man human enough to believe he can outguess the cut-price tag on "job-lots," "discontinued lines" and "surplus stocks."

His opposite is the hard-pan car owner who sticks year in and year out to a standard brand as the only rational economy.

Many will remember the scarcity of U. S. Tires last year.

A hardship at the time, but a benefit now. There are no U. S. Tires to be worked off—no accumulations—no forced selling of any U. S. brand—no shipping of tires from one part of the

country to another to "find a market."

There are 92 U. S. Factory Branches. Each one gets its share of U. S. Tires. There is a broad, constant, even distribution of U. S. Tires always going on from these Branches to the dealer.

Buy a U. S. Tire anywhere—in a community of 500 people or even less—and you get a fresh, live tire of current production—with all the original service and mileage the factory put into it.

The owner of a medium or light-weight car stands on equal ground with every other car owner.

Any United States Tire is a universal full money's worth—backed up with a leadership policy of equal quality, buying convenience and price for everybody.

"The different tire views that come out in a chance talk."

## The KITCHEN CABINET

It isn't a much people's favorite that does the farm as it is their kitchen. So many things that can't be done without it.

### SEASONABLE GOOD THINGS.

A simple dessert which may be given children is the following:

Blueberry Pudding. — The amount of bread used for this pudding depends upon the size of the family. Arrange layers of thinly sliced buttered

bread in a shallow baking dish, pour over enough canned blueberries to cover. Place in a moderate oven and bake until thoroughly hot. Set away to cool and serve unmixed with cream and sugar.

Raisin Tapioca. — Soak one cupful of pearl tapioca overnight in cold water and cook in a double boiler in a quart of milk until soft. Remove from the fire and let cool slightly, stirring in three tablespoonsful of butter. Heat two cupfuls of milk and stir into it three beaten eggs. Add to the warm tapioca. Stir in one cupful of sugar and one-half pound of seeded raisins with the grated yellow rind of one-half a lemon and bake in a moderate oven for an hour, stirring occasionally until the consistency is even all through, then allowing to brown on top.

Apple Frappe With Maple Sauce. — Bake without coring or paring eight good-sized, good flavored apples. Sift through a colander when soft, pressing out the part nearest the skin as this is the best flavored. Add one and one-half cupfuls of sugar, a few cloves and cook, stirring carefully to avoid burning, until the mixture boils. Cool and freeze. Serve in flaring glasses with a garnish of red jelly and the following:

Hot Maple Sauce. — Cook together two cupfuls of maple syrup with one cupful of cream until the soft-ball stage is reached. Remove from the fire, set saucepan in hot water and dip a spoonful over the top of each glass of frappe.

Cake and Cheese Dessert. — Break into small custard cups of glass enough bits of cake to half fill. Add a few raisins, moisten with fruit juice, cover with a layer of grated cheese to nearly fill the cups. Place in a steamer to melt the cheese. Serve with jelly and whipped cream over the top.

## Nellie Maxwell

"Cold in the Head" is an acute attack of Nasal Catarrh. Persons who are subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system, cleanse the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. All Druggists sell. Testimonials free. Send for any case of catarrh that HALL'S CATARRH MEDICINE will not cure. J. J. Cheney & Co., Toledo, Ohio.

### No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a general strength-giving tonic to the whole system. Nature will then throw off or digest the worms, and the Child will be in perfect health. Pleasant to take. 60c per bottle.

White's Cream Vermifuge is certain destruction to intestinal worms. It is harmless to children or adults. Price, 25c. Sold by Hickman Drug Co.

## Baby Is Only a Baby Once

—and in after years—what we would sometimes give for a real home picture showing them as they were.

Every mother is always and forever "going" to take baby up to the photographer—and then putting it off until a "better" day.

Result is that baby outgrows those "cute" ages and only one or two primped up gallery photos for our family collections.

Mrs. Ellis Dobson was the hostess of a delightful reception given on Tuesday afternoon from 3 to 5:30 in honor of her guest, Mrs. J. T. Rosenthal, of Paducah. Mrs. Karl Toller received as the guests arrived, and then were received by Mrs. Dobson, Mrs. Rosenthal and Mrs. Fred Stokes of Water Valley. In the living room, and Mrs. Gus Alexander received at the dining room door, assisted by Mrs. Herman Bradley, who also presided over the victrola. Misses Mary Hollan, Martha Barrett, Mary Stone and Dorothy Moore served in the dining room a two-course menu, consisting of salad and ice cream, followed by strawberry shortcake and candy. Being served in pastry baskets on paper doilies, the baskets decorated in pink lotus flowers. The dining table was very attractive, having for centerpiece a large silver basket filled with opulenta roses, pink ribbon streamers and pink tapers on each corner of the table. The other rooms were also decorated in roses, pink curtains and poodles. Although the day was a very hot one, a large number of friends attended, the affair being thoroughly enjoyed by all.

W. A. McMillan, of Memphis, has been here for several days making a preliminary survey of the new drainage district now in process of organization in the lower bottom. Mac is well known to a large number of Hickman people. He was the engineer in charge of the construction of the C. M. & G. Ry., and he and his family lived here for several years. We are glad to see our friend doing well in his profession.

Will Anderson, seriously injured two weeks ago in the automobile accident at the East Hickman crossing, and who was in such a serious condition, is greatly improved and will recover, it is said. He is now able to sit up.

Miss Frankie Reid returned Friday of last week from Nashville where she accompanied her sister, Miss Carrie Reid, for operation for appendicitis. Miss Carrie Reid is reported doing splendidly.

Friday at The Rex—One of those funny Monkey Comedies produced and released by the Educational Film Exchange, entitled "Ladies' Pet." Also Fox News and 14th Episode of "Fantomas."

Mrs. McCluskey and baby, of Toledo, Ohio, joined her husband here last week and will spend the summer here. Mr. McCluskey is on the pitching staff of the ball team.

## WELL NOW AT 2477 FEET

Rock Has Been Pierced to Depth of 192 Feet.

The well of Honey, Mitchell & Huer at Hickman is now 2477 feet deep. The drill is still in the rock and has reached a depth of 192 feet in this formation. Reports from Elkhorn show the rock in that field to range from 100 feet to 300 feet thick and its composition to be similar to the rock at this place. More feet have been made with the last set of rollers than at any time before. The rock seems to be changing in some manner and reports from the well show that those most concerned are well pleased with the present indication. Any hour may bring the news that the big oil field predicted by geologists to exist in the Redfoot Lake vicinity has been proved.

Now is your chance to own your own Electric Vacuum Cleaner. Only a limited number of cleaners to go out on this limited-time plan. Phone 290 for terms and free demonstration.

Monday at The Rex—After Brady in court at the charges. This is Miss Brady's latest picture and has made a big hit among where played. This is a Modern Picture.

## COMMENCEMENT AT THE COURT HOUSE

Final Exercises for the 1921 Graduates Will be Tonight.

The commencement exercises during the week past have included the laureate sermon preached by the Rev. A. S. Pette, and the class day program which was rendered by the graduating class at the College Building, Monday morning.

The court room of the court house, in which the Sunday morning service was held, was packed with a brilliant assemblage of guests to witness a excellent program of music to be rendered.

A good crowd assembled at the College Monday morning to hear the class day program. Every student on the program was carried out personally and to the credit of those taking part. The luncheon held the day before, and it was unusually good.

This evening at the court house the commencement exercises will be held, including the presentation of diplomas by Prof. J. A. Davis, and the address by Prof. M. H. Rhodes, of the University of Kentucky.

## CIRCUIT COURT IN SESSION AT FULTON

The May term of the Circuit Court opened in Fulton Monday morning. The week's work here. Judge Graham will on the bench and court was started promptly. ## BOATS STUCK IN RIVER

The government barge stuck on a sandbar a few days ago by the steamer Moran, at the foot of No. 8 Island, ten miles below here, is still hard and fast, and in addition, it is reported the steamers John Moran, Natchez and Scott are also aground. The steamer John Moran with four loaded barges, en route to New Orleans, missed the channel at that point and grounded one barge several days ago, the government steamers Natchez, Advent and Scott coming to her assistance. The steamer Moran is not a government barge, but has in tow four government barges. This was her initial trip since coming off the wreck, practically rebuilt all over, and was making a tryout to New Orleans. The barges are loaded with two thousand tons each. These steamers have been working there since the first of the week and were reported aground also on Tuesday night—all but the Advent. They have been attempting to cut the sand from under the barge, the other boats trying to swing the barge back. The barge, however, is said to be a good piece from the channel and, adding to their serious situation, the river is also falling. Captain Grady, representing the Missouri Products Co., whose merchandise is loaded on the barges, arrived here Tuesday and went directly to the barge. Capt. Nowland, of St. Louis, head of the Government Barge Line, has been there for several days doing all possible to relieve the situation. The outcome is doubtful. The barge is a steel one and valued at between \$30,000 and \$40,000. The cargo has not, as yet, been removed.

## REID BROS.

Dr. Herbert Youell, who held a meeting at the Christian church here last year and gave several illustrated lectures, is the guest of the Rev. E. L. Milley and family. While on his way to Texas for chautauqua lectures he was taken sick at Fulton, and after two days of severe illness was urged by the Milleys to come to their home and recuperate sufficiently to travel. All his many friends here will be glad to know he is rapidly improving. His musician and advance agent, a former friend of the Milleys, Miss Hughes, is with him.

Where Sweet Clover Does Not Thrive  
Well an Application of Lime-  
stone is Favored.

Sweet clover is an excellent plant to grow for the land's sake under many conditions, and where it does not grow well now it can be made to grow well by applying ground limestone to the soil. It will add humus and nitrogen to the soil rapidly when plowed under thereby increasing the fertility of the soil in these essential factors.

### BURN CHINCH BUG NESTS

Chinch bugs have made their appearance in certain parts of the United States.

One chinch bug destroyed now may prevent the production of hundreds to infect your wheat field later.

Chinch bugs pass the winter and early spring in wild grass and leaves, especially along hedges and fences and in the edges of woodlands adjoining cultivated fields.

Burn grasses, leaves and other trash where the bugs may have found winter refuge. The bugs not burned will be killed by exposure to the weather.

Clean up all trash and rubbish which may harbor the insects in winter.

### WIRE REPLACING OLD-TIME FENCE

Stone Walls, Split Rails and Hedges Rapidly Being Discarded by Farm Owners.

### MOST IMPORTANT ELEMENTS

Essential That Ends and Corners Be Erected Firm and Solid—Posts Should Be Large Enough to Give Needed Strength.

(Prepared by the United States Department of Agriculture)

Of all the changes wrought in the farming industry during the last century none is more noticeable than that in fencing, say specialists of the United States Department of Agriculture. All over the Eastern United States there are hundreds of miles of stone-wall fences which are monuments to the patience and thoroughness of earlier generations. Overlapping this territory, and extending west, are found fences of split rails with their familiar woods and berry bushes in the hedges, close until further west, where there was neither wood nor stone, are seen osage orange and other hedges. These are mental productions of the time.

The farmer usually finds today that barbed-wire or woven-wire fence will best serve his ends for new construction, and at the same time cost least. Barbed wire is used on large stock ranges where the loss of one or two animals through wire cutting is not serious, but for the farmer with few horses, or a scattered herd of cattle, large mesh woven-wire fences are coming more into use.

Ends and Corners.

The manner in which the fence is erected has much to do with its service. The ends and corners are by far the most important elements of a fence. It is essential that they remain firm and solid in order to hold the fence rigid. The first thing to consider is placing the corners. The posts used should be large enough to give sufficient strength. They should be set deep enough to prevent heaving by the action of frost. They should be braced from each direction of tension by a stout rail about 12 feet long.

Metal and concrete posts are on the market, but a great many farmers cling to wooden ones. The line posts should be approximately 4 inches in diameter. Various woods are used, including cedar, orange, locust, red cedar, mulberry and hickory. They should be thoroughly seasoned and the bark removed, and to get the longest life should be dipped in creosote at a temperature of about 220 degrees, long enough for the preservative to penetrate the wood. These posts are best set in the spring after the frost is out and when the ground is soft. On level ground they may be driven with a maul, but in depressions should be anchored down by 2 by 4 cross pieces spiked on the bottom of the post before setting. The distance between posts depends on the location of the fence and the numbers and kinds of stock to be turned, the average in field fences being about 20 feet.

To construct a woven-wire fence properly it is necessary to have a woven-wire stretcher, a single-wire stretcher to be used in attaching the fence to the end posts, a pair of wire cutters, a barbed-wire stretcher, a splicing tool, and hammers for stapling and fastening the wire. Barbed and woven wire may be unrolled by attaching the reel to the back of a wagon or by running a bar through the core and drawing it along with a horse.

Stretching the Wire. After the wire is unrolled it should be drawn up to the line of posts and freed from adhering trash. The stretchers are then attached and the line wires drawn until they are so taut that they can just be pressed together. Some slack may be allowed for uneven ground. In fastening the wire on the posts the line wire should be kept as nearly horizontal as possible and allowed to follow small irregularities in the ground. The staples should permit horizontal movement of the wire, allowing the weight of the fence to come directly on the corner posts, thus taking care of contraction and expansion due to weather conditions. A woven-wire fence is not complete without a strand of barbed wire above it; this prevents the stock from reaching over and crowding it down.

Set at the Busy Bee.

#### I AM THE BABY.

I am the baby.  
I am the youngest institution in the world and the oldest.  
The earth is my heritage when I come into being and when I go I leave it to the next generation of babies.  
My mission is to leave the earth a better place than I found it.  
With my mother's milk and brothers and sisters I can do this. If the world does not improve too many handiworks. Now I need peace, milk and fresh air and play.  
When I am a little older I shall need good schools in which to learn the lessons of life.  
I want to live, laugh, love, work, play. I want to have good music, read good books, see beautiful pictures. I want to build houses, roads, railroads and cities.  
I want to walk in the woods, bathe in the waters, and play in the snow.  
I am yesterday, today and tomorrow.  
If you will make my way easy now I will help you when I grow up.  
I am your baby—I am the baby.  
We have won the babies of our city, today.  
And pledge our faith to the end.  
Whatever you need.  
With thought and with deed.  
Your earnest realm to defend.

#### SEPARATE PEACE IS PIECE-MAILED BY HOUSE

On the basis of Mr. Harding's decision to resume participation in European councils, it was authoritatively stated Saturday that the separate peace with Germany would be held up pending the outcome of the reparations conference.  
The House resolution, passed last week, was interpreted as a declaration of intent to resume participation in the League of Nations, but it was learned that House leaders are working in accord with the desire of the administration in deferring action on the resolution which the Senate made such haste to adopt.  
Disaffection among Republican senators, particularly the irreconcilables, over the president's note to the Allies Friday increased to a feeling of uneasiness and carefully repressed indignation which they learned that administration influences were at work against the House resolution in the House. Consequent action prevailed among the Democrats.

Recent poultry raising work of the M. & C. United Fruit and Ice Company at a meeting held at the home of J. B. H. on Saturday, May 14. This association is to be organized for the purpose of increasing the profits from poultry and to put an organized force behind the poultry of this county, so you are invited to be present regardless of the breed you have, and be one of the charter members. Those who avail themselves of the opportunity that the Association offers will greatly profit by it and you are urged to come, and join and help make it a great success.

##### KILL THE POTATO BUG

The Colorado potato bugs are getting in their deadly work now. If you will examine your Irish potatoes, you will find great numbers of them crawling about over the potato vines depositing yellow patches of eggs under the leaves. These eggs will hatch in a week's time and one beetle is capable of laying as much as 200 eggs.

There is only one way to successfully combat these insects, and that is by feeding them a little arsenate of lead or Paris green. Of the two poisons I recommend arsenate of lead as it has less free acid in it and will therefore, burn the foliage less, and one is just as effective as the other, as it is arsenic that kills in both cases.

Use arsenate of lead as follows: Use about three tablespoonfuls of arsenate of lead to a gallon of water, or, if a larger quantity is desired, use 1 pound to 50 gallons of water. This solution should be sprayed onto the tops of the potato vines. It should be kept well stirred at all times. It may be applied in the powdered as follows: Mix arsenate of lead with flour in the ratio of one part arsenate of lead and nine parts of flour, and put the mixture in a cheesecloth and sift it over the tops of the potatoes. Paris green may be used similarly.

##### A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.  
Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect. 60c.

#### A HICKMAN INTERVIEW

Mrs. Moss Tells Her Experience.

The following brief account of an interview with a Hickman woman four years ago, and the sequel, will be read with keen interest by every citizen.

Mrs. Richard Moss, Washington St., gave the following statement October 18, 1916: "I used Dean's Kidney Pills and was helped when my kidneys were out of order and my back ached and pained. The action of my kidneys was irregular, at times, and I had black spots before my eyes. I was mighty dizzy sometimes and I felt badly. I can't tell just how my back felt. Sometimes it pained so I would have to holler out. As I had known of Dean's Kidney Pills for some time, I used a few boxes and was helped. I can say a good word for Deans' because they are a mighty good kidney medicine."

On December 3, 1920, Mrs. Moss said: "Dean's Kidney Pills are still my favorite for kidney complaint. They always straighten me up when my kidneys bother me. I am glad to tell any one to take Deans' if they have had kidney troubles."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Dean's Kidney Pills—the same that Mrs. Moss had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.
